

Tree RESEARCH

Trees are amazing organisms. Can you find amazing facts about each part? The first two have been done for you.

BRANCHES

Trees have an amazing underground support system called roots. These roots not only anchor the tree but also communicate and share nutrients with other trees through fungal networks.

TRUNK

LEAVES

BARK

BUDS

ROOTS

Trees have an amazing underground support system called roots. These roots not only anchor the tree but also communicate and share nutrients with other trees through fungal networks.

SEEDS
