

THE HISTORY OF ANIMALS AND HUMANS OVER TIME.

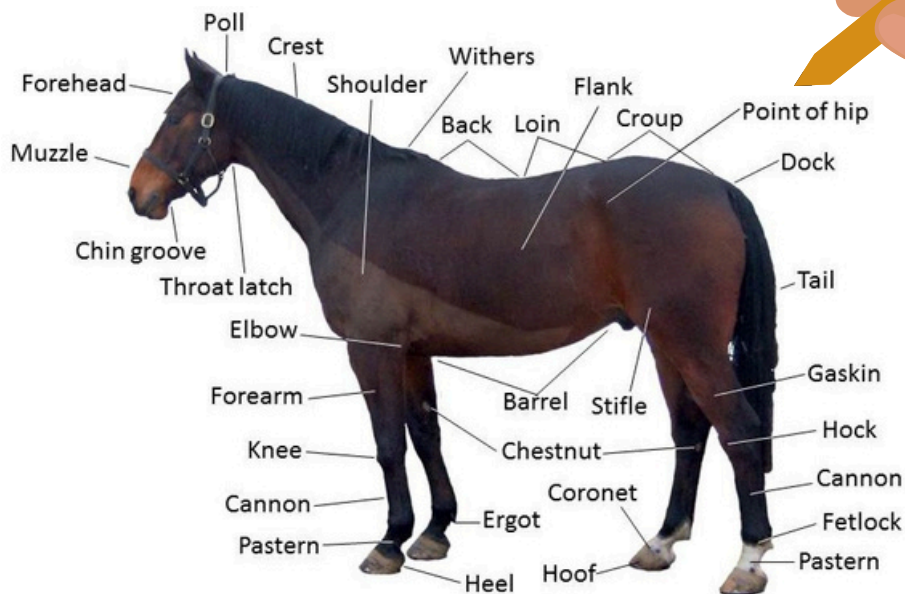

We've always been friends.

ANIMAL: THE HORSE

Write a brief description about the Horse.

Horses are majestic creatures with solid hooves and flowing manes, renowned for their versatility and wide range of breeds. Each breed exhibits unique characteristics in terms of size, strength, and temperament, yet all horses share common traits such as remarkable speed and endurance. These animals have been integral to human societies across the world, serving various roles from transportation and cavalry in battles to aiding agricultural practices by plowing fields and pulling carts.

Draw and Label the parts of a horse.

How have they assisted humans over time ?

Domestication began around 3500 BCE, with widespread use by various civilizations including the Egyptians for chariots. Humans have relied on horses for thousands of years. They were essential for transportation, allowing people to travel greater distances quickly. Horses also played a crucial role in agriculture by pulling plows and carts, and in warfare, serving as mounts in battle which often changed the outcomes of historical conflicts.
