

This week, embark on a distinctive mission: champion Sustainable Cities and Communities! Your task: **Select one compelling activity** from Sustainable Development Goal 11: Sustainable Cities and Communities. Whether you're working alone, teaming up with peers, or involving your entire class, dedicate your week to achieving as many objectives as you can from the list provided.

Build a Mini Green City: Use recycled materials to build models of sustainable buildings or even an entire green city. Then hold a day where you talk about what is special about your city to the other children in the school.

Visit a Green Building: Arrange a visit to a green-certified building in your area. Learn about its sustainable features and share insights with your class on how buildings can help or hurt the environment.

Digital Divide Workshop: Set up a workshop where tech-savvy students teach seniors or underprivileged community members how to use the internet effectively for education and jobs.

Recycled Art Competition: Use discarded materials to create art pieces that highlight the importance of recycling in urban environments. Show off your creations in a school exhibition.

Rainwater Harvesting Initiative: Set up a system at school to collect and reuse rainwater. Understand water conservation techniques and their importance in managing urban water resources.

11 SUSTAINABLE CITIES AND COMMUNITIES

Eco-friendly Product Sale: Design and sell products made from recycled materials. Donate the proceeds to a local charity focused on improving public spaces in underprivileged areas.

Clothes Swap Event: Host a clothes swapping event to promote recycling and discuss how fashion impacts city waste and sustainability. Invite local media to cover the event to spread awareness.

Eco-Transport Poster Campaign: Design posters that promote the use of bicycles, public transport, or walking instead of cars. Display them around your school and community to spread awareness.

Community Green Space Revival: Work with parents to transform an unused area into a green space or community garden. Once complete, have a grand opening where the community come together to officially open the space.

Sustainable Transport Campaign: Launch a campaign at your school to encourage walking, biking, or using public transit. Track the impact by month and share the results with your school community.

Community Greening Day: Organize a day where students and teachers come together to plant trees or set up a garden in a local urban area. Document the day's impact and continue to monitor the growth in the community.

Sustainability Film Day: Host a film screening day featuring documentaries about urban sustainability and follow it with student-led discussions on the topics presented.

Urban Gardening Club: Start a club focused on urban gardening. You could use school grounds or collaborate with local businesses to use their unused spaces.

"Alone We Can Change Today, But Together We Can Change Forever."
