

EARTH

Earth is approximately 4.5 billion years old, making it an ancient and enduring planet.

Our planet is home to over 7.9 billion people, showcasing the remarkable diversity of human life.

With a circumference of around 40,075 kilometers, Earth provides an expansive playground for exploration.

Over 70% of Earth's surface is covered by water, hosting vast oceans and supporting diverse marine ecosystems.

Earth's atmosphere extends about 480 kilometers above its surface, shielding us from the harshness of space and enabling life to thrive.
