During this course, we're diving into SDG 17: Partnerships for the Goals. Your challenge is to explore how we can contribute to fostering global partnerships, enhancing collaboration, and working together right from our classroom. **Choose one challenge from the list** that sparks your interest, and let's see what innovative solutions we can create to support a more connected and cooperative world.

Neighbourhood Food Drive: Partner with a local food bank and collect non-perishable food items from your neighbours to help families in need. Every can counts!	**Visit Local Businesses:** Take a trip to local businesses to learn about how they support your community. Interview owners about their partnerships and the impact they have.	**School Supply Drive:** Work with local stores to collect school supplies for students who need them. Let's make sure everyone has the tools they need to succeed.	**Charity Run:** Join a national charity run or organise your own. Raise funds for a good cause and show how teamwork can make a big difference.	**Senior Centre Visits:** Partner with a local senior centre and plan regular visits to spend time with the elderly. Share stories, play games, and create arts and crafts together.
Public Library Collaboration: Team up with your local library to organise a community reading day. Invite local authors, storytellers, and readers to join in and share their favourite books.	**Online Book Club:** Start an online book club with students from other states. Choose books that explore different cultures and discuss them together through virtual meetings.	**Community School Partnership:** Establish a partnership with a school in another area of your city. Exchange cultural information, collaborate on projects, and build lasting friendships.	**Local History Documentary:** Team up with a local historical society to create a documentary about your community's history. Interview older residents, collect stories, and present your findings.	**Local Wildlife Survey:** Collaborate with a local wildlife organisation to conduct a survey of local wildlife. Record your findings and share them with the community to promote biodiversity awareness.
		Global Cooking Show: Organise a virtual cooking show with students from different countries. Share recipes and cook traditional dishes together while learning about each other's culinary traditions.	**17 PARTNERSHIPS FOR THE GOALS**	**Community Service Day:** Organise a community service day where students partner with local organisations to help with various projects like painting, gardening, or building.

"Alone We Can Change Today, But Together We Can Change Forever."
