Our Journey to Save the
World

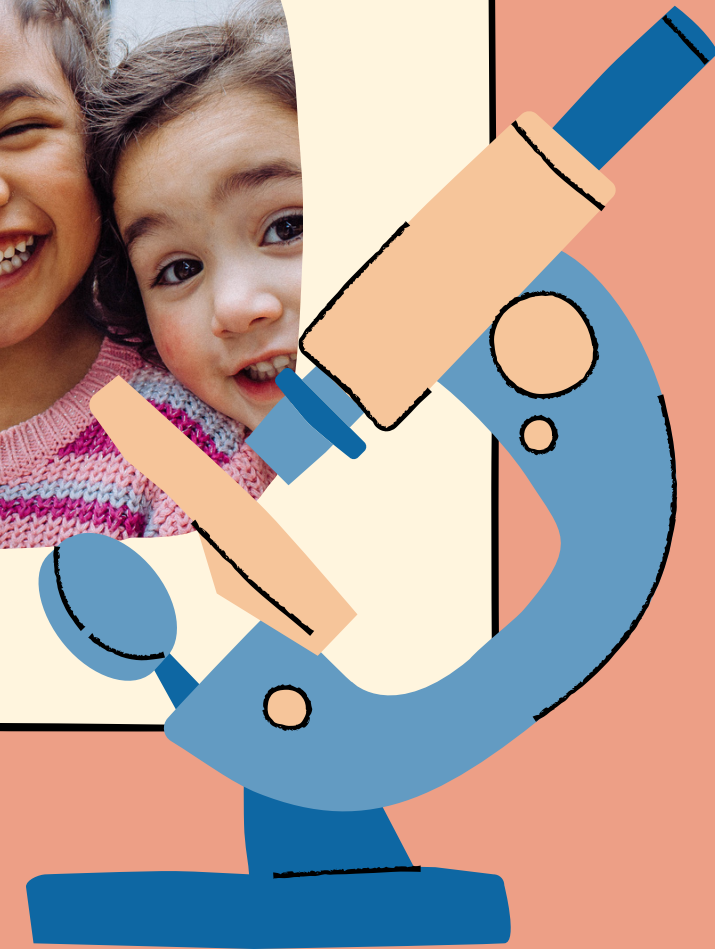

Dear World
Here's our Story!

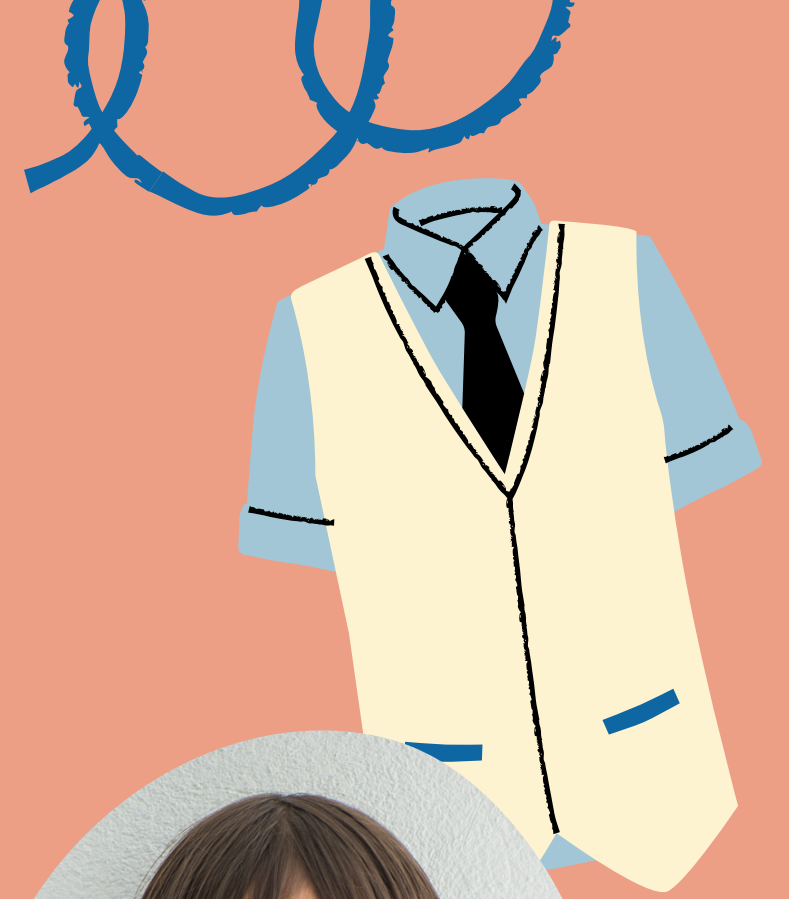

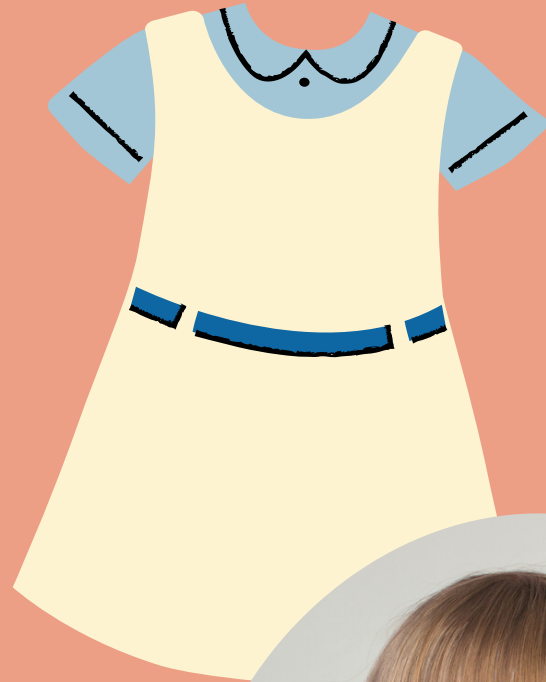

Welcome to NEW INDIAN MODEL School

We are a school in the UAE. Our School's mission is to help every living organism on Earth have a bright and safe future!

Speaker

Introduction

The Grade five students at Pinkerton Primary School have decided that they were going to attempt to achieve all 17 of the sustainability goals for the world alongside the United Nations. They understood that there are significant issues facing the future of our planet and they wanted to do something about it and all in 10 weeks!

Here's Their Story

Our Goals

OUR FIRST GOAL

To put together a team of people that felt the same way about the problems the world was facing!

OUR SECOND GOAL

To set clear goals for our community to achieve and to use our voice to get as many people involved as possible,

THIRD GOAL

To build a community of people who care about the environment and all of the living beings on this planet!

Our Biggest Achievement

WRITING TO THE MINISTER

We decided to write a letter to the minister of education to invite him to our school. We wanted to talk about our feelings regarding educational standards in rural areas of our country.

THE RESULT

The minister for education turned up at our school and held a discussion with the families regarding how we can help communities less fortunate than ours. The result was that he promised to increase funding to schools in rural areas to bridge the gap in education.

Other things that are taking shape in the community

NO MEAT THURSDAY

Each and every Thursday our whole school attempts to minimise the amount of meat they consume. This action limits the amount of greenhouse gasses that enter the atmosphere and fights global warming

WALK TO SCHOOL WEDNESDAY

Every student walks to school on Wednesdays. As we know cars and buses cause a lot of pollution. We have started a 'walking and talking club' and some families are even walking to school everyday.

COMMUNITY FOOD BANK

Families in our community have decided that each Sunday evening, they will take a look in your fridge and any food that is about to expire will be collected and taken to the local food bank to feed the hungry and homeless

What People are Saying?

BARBARA - SCHOOL PRINCIPAL

'I never realised how powerful our students voice was until I saw them drive this kind of change in our community'

SIR EDWARD HARDY - HEALTH MINISTER

'To see the children drive change like this is remarkable, this community will never be the same again.'

STEVE COX - PARENT GOVERNOR

'The future of our children is our responsibility and this change was one we all needed!'

Our 60-Second Pitch

As a group, we recorded a 60-second video to tell the world about our mission and we would like to share that pitch video with you here today!

Our Achievements and the future

	1. Learn about climate solutions ✓	2. Call for more renewable energy in your country ✓		3. Eat more plants and cut down on meat ✓
4. Walk and cycle rather than drive ✓	5. Spread awareness about ways to stop global warming. ✓	6. Demand leaders take bold climate action today ✓	7. Compost food scraps. ✓	8. Unplugs TVs, computers and other electronics when not in use. ✓
		13 CLIMATE ACTION 	9. Drive less. Walk, cycle, take public transport or car pool. ✓	10. Air dry. Let your hair and clothes dry naturally. ✓

As a school we managed to achieve all of the goals we set our community and we are very happy about the outcome!

THE FUTURE OF PINKERTON

Our community will continue to do our best to make the world a better place for everyone who lives on Earth

Thank You!
