

HOW TO CONSTRUCT AN ARTICLE

Follow these steps and everyone will be reading your ideas

Find a Catchy Title

What is the article about?

Never use a complete sentence

Introduction

What will your article be discussing?

Get the reader hooked

Body

Tell the situation in detail. What is the problem and **what are you doing about it?**

Statistics

Make sure that you use your statistics when you write the body. **Tell us that you know your stuff!**

Closing

What do you want us to do with the information we have just read?

One School's Mission to Save the World.

As we all know, the world is in desperate need of assistance when it comes to climate change. Well, the students here at Pinkerton Primary School have a plan to save it and they need your help!

What's happening?

The Grade five students at Pinkerton Primary School have decided that they are going to attempt to achieve all 17 of the sustainability goals for the world alongside the United Nations. They understand that there are significant issues facing the future of our planet and they want to do something about it and all in 10 weeks!

What are the problems?

- The last decade was the hottest in 125,000 years.
- Carbon dioxide levels are at their highest in two million years and 85% comes from burning fossil fuels.
- 1.2 trillion tonnes of ice is lost each year, and if all of this ice melts, the sea levels will rise by 70 metres.
- Humans cut down or burn away 10,000 acres of the Amazon Rainforest every single day. That's a football pitch every minute.

What can you do to help?

Teachers, parents and students are welcoming any offers of help to improve the sustainability of the local area. They are also requesting ideas and assistance to advance towards being a 100% sustainable community.

We only have one Earth and the children at Pinkerton Primary School are aiming to save it.
