

NATURAL RESOURCES AROUND THE WORLD

Choose three natural resources and complete the chart about how they are used in your chosen culture and how we can protect it.

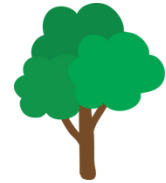

SUNLIGHT

WATER

AIR

PLANTS

ANIMALS

SOIL

ROCKS AND MINERALS

FOSSIL FUELS

RESOURCE	WHAT DO THEY USE IT FOR?	HOW CAN WE PROTECT IT?
<p>WATER</p>	<p>Nepal uses its lots of rivers and lakes to make electricity through hydropower. People also need this water for farming, drinking, and cleaning.</p>	<p>To keep the water clean and safe, Nepal can make rules about using water wisely, build things to save water, and teach everyone why it's important not to waste water.</p>
<p>AIR</p>	<p>Nepal uses air for energy and fun activities. They're starting to use wind to make electricity, which is clean and good for the planet. Also, paragliding is a popular sport in places like Pokhara, where you can glide in the sky and see beautiful mountains and lakes</p>	<p>Nepal can help keep the air clean by making sure cars and factories aren't polluting too much, encouraging people to use buses and bikes instead of cars, and planting more trees in cities to help clean the air.</p>
<p>PLANTS</p>	<p>Nepal has lots of different plants that are used for medicine, food, and to attract tourists who come to see its beautiful nature and wildlife.</p>	<p>To protect its plants, Nepal can look after its forests and jungles, use farming methods that don't harm the environment, and make more areas where plants and animals are protected from being cut down or disturbed.</p>
