

During this course, we're diving into SDG 15: Life on Land. Your challenge is to explore how we can contribute to preserving and sustaining our terrestrial ecosystems right from our classroom. **Each week, choose 1 challenge** from the list that sparks your interest, and let's see what innovative solutions we can create to support our planet's diverse land and life forms.

<p><b>Endangered Species Campaign:</b> Research local endangered species and create campaigns to educate our community about these species and how to protect them. ✓</p>	<p><b>Insect Hotel Creation:</b> Build 'insect hotels' to provide homes for beneficial insects. Learn about their important roles in our ecosystems. ✓</p>	<p><b>Seed Bomb Workshop:</b> Learn how to make seed bombs with native plant seeds and distribute them to help our plants grow in the right places. ✓</p>	<p><b>Nature Clean-Up Days:</b> Join in on clean-up days at nearby parks or forests. Learn about the impact of litter on our land ecosystems and help make a difference. ✓</p>	<p><b>Wildlife Observation:</b> Observe local wildlife and document your findings. Create a report highlighting why each species is important to our ecosystem. ✓</p>
<p><b>Seed-to-Tree Journey:</b> Grow a seed into a sapling and then replant it outdoors. Watch and learn how a tiny seed becomes a part of our ecosystem! ✓</p>	<p><b>Composting Workshop:</b> Discover how to compost and understand its benefits for the health of our soil and plants. Once you understand, start a composting club at school and encourage everyone to recycle their waste food. ✓</p>	<p><b>Ecosystem Model Projects:</b> Build a model of our local ecosystem. Show how different organisms live together and depend on each other. ✓</p>	<p><b>Recycled Art Competition:</b> Use recycled materials to create beautiful artworks. Show how recycling can help our environment and have fun being creative!</p>	<p><b>Community Garden Project:</b> Let's start a garden at our school! You'll learn to grow native plants and understand their role in our local biodiversity. ✓</p>
<p><b>15 LIFE ON LAND</b></p> 	<p><b>Nature Photography Exhibition:</b> Take photographs of our local flora and fauna. We'll hold an exhibition to show everyone the beauty and diversity of our local environment. ✓</p>			<p><b>Local Tree Diary:</b> Choose a local tree and keep a weekly diary of its changes, wildlife visitors, and its importance in our ecosystem. Share your tree's story in a creative way at the end of the term.</p>

"Alone We Can Change Today, But Together We Can Change Forever."
