

This week, embark on a unique mission: Work towards Responsible Consumption and Production!

Your task: Choose one exciting activity from Sustainable Development Goal 12: Responsible Consumption and Production. Whether you're working alone, teaming up with peers, or involving your entire class, dedicate your week to achieving as many objectives as you can from the list provided.

<p>DIY Compost Bin: Get your hands dirty making a compost bin for our school. Watch your food scraps turn into compost that can help our garden grow.</p>	<p>Upcycle Art Contest: Use your creativity to make amazing art from items that would usually be thrown away. See who can make the coolest piece from recyclable materials!</p>		<p>Zero Waste Challenge: Try to create the least trash possible for a week. Keep track of what you throw away and think of ways to reduce it. Share your tips and tricks with the class!</p>	<p>Local Clean-Up Day: Help clean up a local park or beach with your friends and neighbours. It's a great way to take care of our community and keep our environment clean.</p>
<p>Organise a Community Swap Meet: Be part of a cool event where you can swap things like clothes, toys, and books with others. It's like shopping, but everything is free and you're helping the planet!</p>	<p>12 RESPONSIBLE CONSUMPTION AND PRODUCTION</p> 	<p>Packaging Design Challenge: Redesign the packaging of your favorite school snack to be more environmentally friendly. Use recyclable materials and think about how to reduce waste. Present your new design to the class and discuss the impact of less waste.</p>	<p>Lunch Waste Audit: Conduct a waste audit of your school lunches for a week. Collect data on what gets thrown away and brainstorm ideas with your classmates on how to reduce this waste. Create a plan to implement the best ideas.</p>	<p>DIY Recycled Paper: Learn how to make your own recycled paper using old newspapers and scrap paper from around the school. Use your homemade paper for art projects or notes to see how recycling works firsthand.</p>
<p>Eco-Fashion Show: Organize a fashion show using outfits made from reused or recycled materials. Challenge your classmates to create the most innovative and stylish outfits from things that would have been thrown away.</p>	<p>Energy Saving Detectives: Become an energy detective for a week. Find out where your school is wasting the most energy and come up with a plan to save electricity. Present your findings and solutions to the school administration.</p>	<p>Recycling Bin Art: Collaborate with local artists to decorate community recycling bins. Make them bright and attractive to encourage more people to recycle properly.</p>	<p>International Plastic-Free Day: Campaign for an international day where students and schools around the world pledge to avoid using single-use plastics. Share your school's success stories and challenges online.</p>	<p>Green Ingredient Challenge: Can you make a snack using only local and sustainable ingredients? Find out where your food comes from, talk about why local is better, and share your delicious creations with your classmates.</p>

"Alone We Can Change Today, But Together We Can Change Forever."
