

Really Big Numbers

There are **7.8 billion humans** on Earth. But that's nothing compared to some of the other creatures that live alongside us. Take a look at the creatures below and research how many inhabit this planet too. Be careful, some of the numbers get very big indeed.

The first two have been done for you.

Rank	Animal/Entity	Estimated Population or Number	Place Value Name
1	Insects		Quintillion
2	Antarctic Krill		Trillion
3	Bacteriophage		Undecillion
4	Migratory Locusts	12,500,000,000,000	Trillion
5	Chickens		Billion
6	Ants	1,000,000,000,000,000	Quadrillion
7	Soil Bacteria		Hundred sextillion
8	Termites		Quadrillion
9	Phytoplankton		Octillion
10	Nematodes		Hundred sextillion
