

How to Make a Rain Catcher

upschool

Use recycled materials to design a container that can collect rainfall from the sky. Your objective is to then use the rainfall to help make the world a little bit better. What you choose to do with your collected water is up to you. 'Sharing is caring!!'

Ten things you can do with your collected water

- **Water Plants:** Use rainwater to give your garden plants a drink.
- **Help Animals:** Fill a bird bath or make a little pond to help birds and bugs.
- **Do Science Fun:** Use rainwater for cool experiments at school.
- **Make Art:** Paint with rainwater instead of tap water.
- **Grow Food:** Help water plants in a community garden.
- **School Projects:** Show your friends how to save water with a school project.
- **Clean Up:** Use rainwater to wash playground toys and sports gear.
- **Help the Earth:** Pour rainwater on the soil to keep it healthy.
- **Share Water:** Give extra rainwater to places that need it like parks.
- **Teach Others:** Run a mini-class to teach your mates about collecting rainwater.

Your Finished Product
