

Layers of the Earth

In preparation for making this week's teaching resource on the layers of the Earth, we would like you to research each layer and try to describe it in **30 words** or less.

The Crust

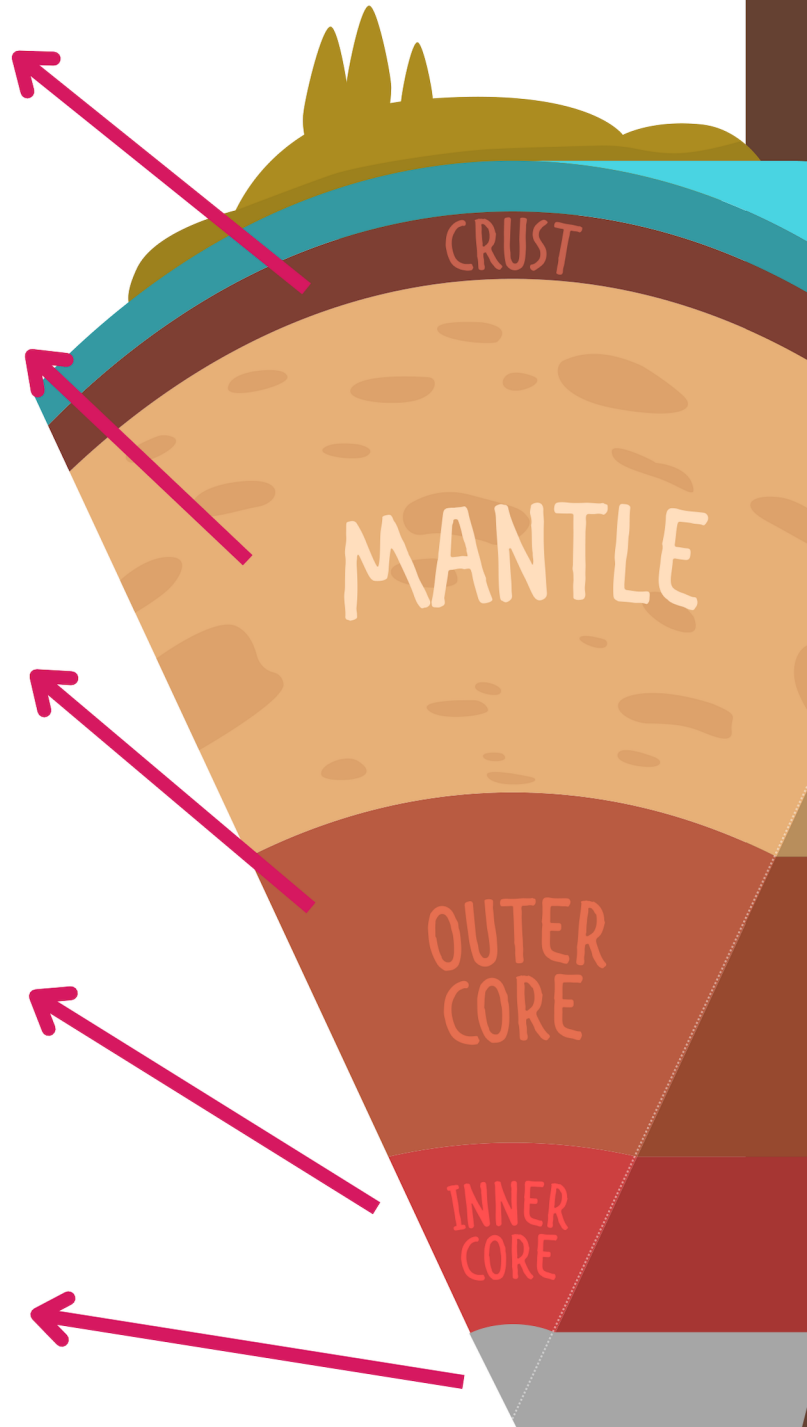

The Earth's crust is the top layer of the planet made up of different rocks, where we find mountains, oceans, and important resources like soil, water, and minerals.

The Mantle

The Outer Core

The Inner Core

The Innermost Inner Core

Remember to make sure that you fact-check your research, as you will be using this information to teach somebody else about this subject.
